REMARKS

The figures of births and deaths shown in this statement for week ending the 17th March, 1956, relate to 183 towns with an estimated population of 23,311 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 58% of the total number of towns representing 56% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 14,440 and 5,446 representing birth and death rates of 32.2 and 12.1 per thousand of population respectively.

(a) States (Part A and C).—The data here relate to 142 towns with an estimated population of 17,224 thousands. Information about Assam, Bhopal, Bombay, Madhya Pradesh, and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 56% of the total number of towns representing 52% of the total popula-

tion is covered. The numbers of births and deaths recorded in these towns were 11,534 and 4,364 representing birth rates and death rates of 34.8 and 13.2 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B):—The data here relate to 41 towns with an estimated population of 6,087 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 63% of the total number of towns representing 75% of the total population is covered. The number of births and deaths recorded in these towns were 2,906 and 1,082 representing birth and death rates of 24.8 and 9.2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
